

March 2, 2011

Stewart Heating and Air,

I do want to express my thanks and appreciation for the professional workmanship and the honest and responsive dealings we had through-out this project in our home. The air conditioning system went without any problems, and the heating system, although there were some unforeseen problems, eventually were resolved, thanks to your patience and willingness to meet our expectations. Thank you for your responsiveness when we encountered those problems and for your workers who conducted themselves as gentlemen and went the extra mile to please us. The system now is running beautifully. Thank you also for bringing by the extra supply of electrostatic filters.

Yours truly,

Richard and Janelle Mota

Bryan and Ron were especially responsive and very much gentlemen throughout the project, as were the others (don't remember all the names).
