

Service Request

Name: Bob Wright

Comments or Questions: To Bill Stewart In Jan my furnace stop working on a thursday morning.I called you and your estimator came right out and installed my furnace. Following the startup kevin checked the floor vents & found family rm low cfm. He couldn't go under the house because of water. Monday was dry so kevin saw that the house had been repiped two years ago but the family rm hadn't been renewed. Kevin &Jon took out old pipe and installed new ridge pipe. Everthing works fine. I would like to say both workers were very professional and did not track dirt into the house. Kevin finalized his work by checking to make sure everything was working. I appreciate the quality of work that was done. Bob Wright
